NEN-EN-ISO 5172

Gas welding equipment - Blowpipes for gas welding, heating and cutting - Specifications and tests (ISO/DIS 5172:2004, IDT)

Publicatie uitsluitend voor commentaar

juni 2004
ICS 25.160.30

Commentaar voor 2004-10-17

Zal vervangen NEN-EN-ISO 5172:1996

Als Europees normontwerp is gepubliceerd: prEN ISO 5172:2004, IDT

Definitief vastgestelde normen zullen als Nederlandse norm gelden. Daarom wordt dit normontwerp in Nederland voor commentaar gepubliceerd. Op het ontwerp ingebracht commentaar zal aan de bevoegde normcommissie worden voorgelegd die hiermee rekening zal houden bij de bepaling van de Nederlandse stem. Indien er geen bezwaar bij NEN wordt ingebracht, kan dat leiden tot ongewijzigd definitieve vaststelling van het ontwerp als norm.

Van Europese normen bestaan drie officiële versies: Engels, Frans en Duits. Voor Nederland zal de Engelse versie gelden, tenzij voor een geautoriseerde versie in het Nederlands wordt gekozen.

Normcommissie 341 008 "Lassen en verwante processen"

Apart from exceptions provided by the law, nothing from this publication may be duplicated and/or published by means of photocopy, microfilm, storage in computer files or otherwise, which also applies to full or partial processing, without the written consent of the Netherlands Standardization Institute.

The Netherlands Standardization Institute shall, with the exclusion of any other beneficiary, collect payments owed by third parties for duplication and/or act in and out of law, where this authority is not transferred or falls by right to the Reproduction Rights Foundation.

Auteursrecht voorbehouden. Behoudens uitzondering door de wet gesteld mag zonder schriftelijke toestemming van het Nederlands Normalisatie-instituut niets uit deze uitgave worden veelevoudigd en/of openbaar gemaakt door middel van fotokopie, microfilm, opslag in computerbestanden of anderszins, hetgeen ook van toepassing is op gehele of gedeeltelijke bewerking.

Het Nederlands Normalisatie-instituut is met uitsluiting van ieder ander gerechtigd de door derden verschuldigde vergoedingen voor veelevoudiging te innen en/of daartoe in en buiten rechte op te treden, voor zover deze bevoegdheid niet is overgedragen c.q. rechtens toekomt aan de Stichting Reprorecht.

Although the utmost care has been taken with this publication, errors and omissions cannot be entirely excluded. The Netherlands Standardization Institute and/or the members of the committees therefore accept no liability, not even for direct or indirect damage, occurring due to or in relation with the application of publications issued by the Netherlands Standardization Institute.

Hoewel bij deze uitgave de uiterste zorg is nagestreefd, kunnen fouten en onvolledigheden niet geheel worden uitgesloten. Het Nederlands Normalisatie-instituut en/of de leden van de commissies aanvaarden derhalve geen enkele aansprakelijkheid, ook niet voor directe of indirecte schade, ontstaan door of verband houdend met toepassing van door het Nederlands Normalisatie-instituut gepubliceerde uitgaven.

Will supersede EN ISO 5172:1996

English version

Gas welding equipment - Blowpipes for gas welding, heating
and cutting - Specifications and tests (ISO/DIS 5172:2004)

Matériel de soudage aux gaz -- Chalumeaux pour soudage
aux gaz, chauffage et coupage - Spécifications et essais
(ISO/DIS 5172:2004)

This draft European Standard is submitted to CEN members for parallel enquiry. It has been drawn up by the Technical Committee CEN/TC 121.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

EUROPEAN COMMITTEE FOR STANDARDIZATION
COMITÉ EUROPÉEN DE NORMALISATION
EUROPÄISCHES KOMITEE FÜR NORMUNG

Management Centre: rue de Stassart, 36 B-1050 Brussels

Foreword

This document (prEN ISO 5172:2004) has been prepared by Technical Committee ISO/TC 44 "Welding and allied processes" in collaboration with Technical Committee CEN/TC 121 "Welding", the secretariat of which is held by DIN.

This document is currently submitted to the parallel Enquiry.

This document will supersede EN ISO 5172:1996.

Endorsement notice

The text of ISO 5172:2004 has been approved by CEN as prEN ISO 5172:2004 without any modifications.

Matériel de soudage aux gaz — Chalumeaux pour soudage aux gaz, chauffage et coupage — Spécifications et essais

(Revision of ISO 5172:1995, ISO 5172:1995/Amd.1:1995 and ISO 5186:1995)

ICS 25.160.30

ISO/CEN PARALLEL ENQUIRY

The CEN Secretary-General has advised the ISO Secretary-General that this ISO/DIS covers a subject of interest to European standardization. **In accordance with the ISO-lead mode of collaboration as defined in the Vienna Agreement, consultation on this ISO/DIS has the same effect for CEN members as would a CEN enquiry on a draft European Standard.** Should this draft be accepted, a final draft, established on the basis of comments received, will be submitted to a parallel two-month FDIS vote in ISO and formal vote in CEN.

In accordance with the provisions of Council Resolution 15/1993, this document is circulated in the English language only.

Conformément aux dispositions de la Résolution du Conseil 15/1993, ce document est distribué en version anglaise seulement.

To expedite distribution, this document is circulated as received from the committee secretariat. ISO Central Secretariat work of editing and text composition will be undertaken at publication stage.

Pour accélérer la distribution, le présent document est distribué tel qu'il est parvenu du secrétariat du comité. Le travail de rédaction et de composition de texte sera effectué au Secrétariat central de l'ISO au stade de publication.

THIS DOCUMENT IS A DRAFT CIRCULATED FOR COMMENT AND APPROVAL. IT IS THEREFORE SUBJECT TO CHANGE AND MAY NOT BE REFERRED TO AS AN INTERNATIONAL STANDARD UNTIL PUBLISHED AS SUCH.

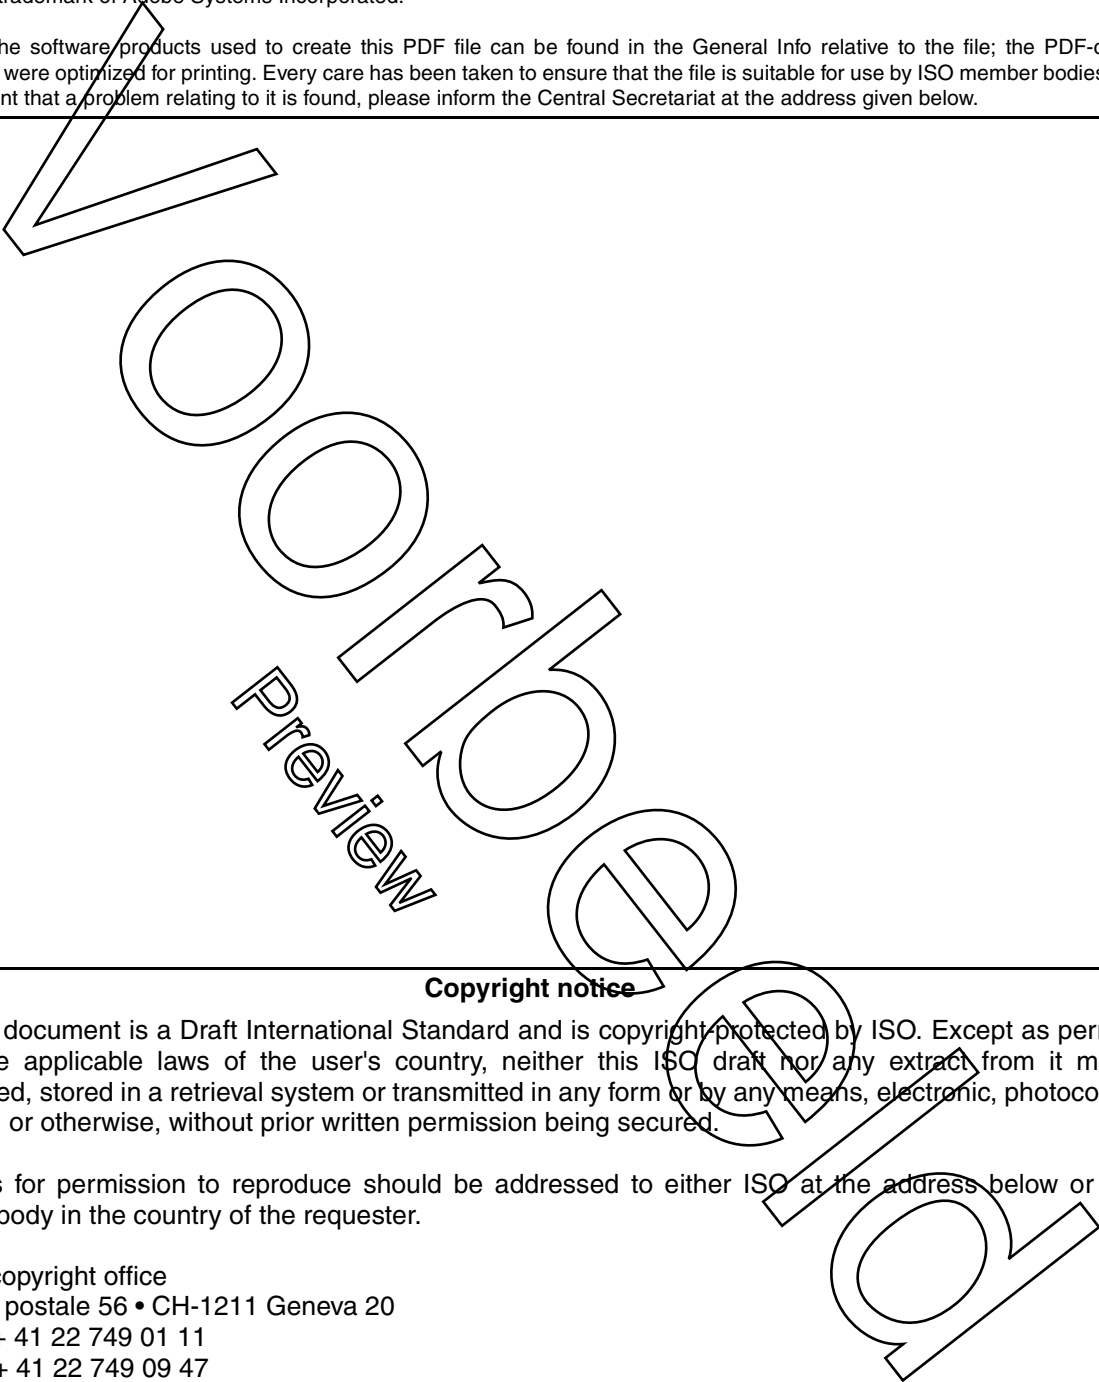

IN ADDITION TO THEIR EVALUATION AS BEING ACCEPTABLE FOR INDUSTRIAL, TECHNOLOGICAL, COMMERCIAL AND USER PURPOSES, DRAFT INTERNATIONAL STANDARDS MAY ON OCCASION HAVE TO BE CONSIDERED IN THE LIGHT OF THEIR POTENTIAL TO BECOME STANDARDS TO WHICH REFERENCE MAY BE MADE IN NATIONAL REGULATIONS.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 5172 was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 8, *Equipment for gas welding, cutting and allied processes*.

This document will replace ISO 5172:1995 and ISO 5186:1995.

Annexes A to G and I of this International Standard are informative.

Annex H of this International Standard is normative.

Gas welding equipment — Blowpipes for gas welding, heating and cutting — Specifications and tests

Introduction

Requests for official interpretations of any aspect of this standard should be directed to the Secretariat of ISO/TC 44/SC 8 via your national standards body, a complete listing which can be found at www.iso.org.

1 Scope

This International Standard applies to blowpipes for gas welding, heating and cutting of metals and gives specifications and corresponding type tests.

This International Standard covers manual blowpipes for welding and heating with a nominal thermal power up to 32 000 kcal/h and manual and machine cutting blowpipes with a cutting range up to 300 mm.

For the most common fuel gases the corresponding flow rates are given in Annex A, Table A.1.

Air-aspirated blowpipes are excluded from this International Standard (see ISO 9012).

NOTE Blowpipes with greater nominal thermal power or cutting range can also be tested in accordance with this standard if the test requirements are suitable.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 554, *Standard atmospheres for conditioning and/or testing — Specifications.*

ISO 3253, *Gas welding equipment — Hose connections for equipment for welding, cutting and allied processes.*

ISO 5175, *Equipment used in gas welding, cutting and allied processes — Safety devices for fuel gases and oxygen or compressed air — General specifications, requirements and tests.*

ISO 9012, *Gas welding equipment — Air-aspirated hand blowpipes — Specifications and tests.*

ISO 9090, *Gas tightness of equipment for gas welding and allied processes.*

ISO 9539, *Materials for equipment used in gas welding, cutting and allied processes.*

ISO/DIS 15296, *Gas welding equipment — Terminology — Terms used for gas welding equipment.*

3 Terms and definitions

For the purposes of this document the terms and definitions given in ISO/DIS 15296 and the following apply.

Examples of blowpipes are given in Annex B.

3.1 Mixing system

3.1.1

low-pressure blowpipe

a blowpipe, in which the fuel gas pressure – measured immediately before the mixing chamber – is lower than the pressure of the gas mixture – measured between the mixing chamber and welding nozzle

$$p_f < p_m$$

NOTE Fuel gas and oxygen/compressed air are mixed by the action of the latter gas which, being discharged from the orifice of the injector generates suction at point “A” of the mixing system thus entraining the fuel gas. See examples of injector-mixer, fixed or adjustable in Figure 1 and Figure 2.

Key

- | | | | | | |
|---|-----------------------|-------|--|-------------|---------------|
| 1 | fuel gas | p_f | pressure of fuel gas | $p_f < p_m$ | low pressure |
| 2 | oxygen/compressed air | p_o | pressure of oxygen (or compressed air) | $p_f > p_m$ | high pressure |
| 3 | pressure nozzle | p_m | pressure of mixture | $p_o > p_m$ | |
| 4 | mixture | | | | |
| 5 | mixing chamber | | | | |
| 6 | mixing nozzle | | | | |
| A | point A | | | | |

Figure 1 — Injector-mixer for low-pressure and high-pressure blowpipes
