Potential Drawbacks

- Expertise still required to incorporate horizontal requirements into product standards
- Lack of laboratory capacity in some sectors
- Horizontal approach more problematic for content

7

Horizontal Notification

- When requirements included in products standard they will reference the horizontal test methods and the performance classes
- This will form part of the essential information on the CE mark for the product
- AVCP classification to be confirmed
- AVCP determines role of Notified Body

8

Requirements of a NB

1. Established under national law
2. Independent of the organisation or product being assessed
3. The body, top level management and personnel responsible for the tasks shall not be the designer manufacturer, supplier, installer
4. Shall have liability insurance
5. Personnel bound to observe professional secrecy
6. Must take part in NB coordination activities

9

Requirements of a NB

The notified body personnel shall:

- a) Be trained in all of the tasks they undertake
- b) Have an understanding of the applicable standards and of the relevant parts of the Regulation
- c) Be able to draw up the certificates, records and reports to demonstrate that the assessments and testing has been carried out

10

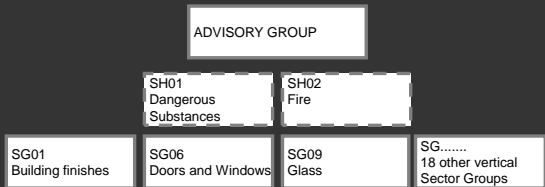

(CPR Article 55) - Coordination of NBs

The Commission shall ensure that an appropriate framework for coordination and cooperation between bodies are put into place

Member States shall ensure that bodies notified by them participate in the work of that group either directly or by means of designated representatives or shall ensure that representatives of the NB are informed

11

Structure of Group of Notified Bodies of the CPD (GNB-CPD)

    AG --- SH02[SH02 Fire]
    SH01 --- SG01[SG01 Building finishes]
    SH01 --- SG06[SG06 Doors and Windows]
    SH01 --- SG09[SG09 Glass]
    SH01 --- SG18[SG..... 18 other vertical Sector Groups]
    SH02 --- SG01
    SH02 --- SG06
    SH02 --- SG09
    SH02 --- SG18
    
```

12

GNB-CPD SH01 Dangerous Substances

- European Group of Notified Bodies for CPD (CPR)
- Advisory Group only
- 23 Sector Groups, 2 Horizontal Groups
- SH01 Dangerous Substances will also cover BWR 7 Sustainability
- Chair of SH01 – John Hubbard

13

CONCLUSIONS

- Horizontal Standards developed on an exposure basis independent of material
- Standard developed will need to be referenced in CPR Product Standards
- Role of Notified Bodies in Testing and Certification
